

Harjapan Singh Bhatia

AI Engineer | Full-Stack Developer

+91 9915385683 • harjapansingh120405@gmail.com • [LinkedIn](#) • [Github](#) • Chandigarh, India

SUMMARY

Computer Science undergraduate (Data Science) and full-stack developer specializing in AI-native products — RAG pipelines, LLM-powered chatbots, and voice agents. Across a six-month engineering internship, designed and shipped 10+ AI and full-stack systems spanning hybrid and graph-based retrieval (Elasticsearch, FalkorDB), conversational AI, and voice automation, alongside production React, Node.js, and FastAPI applications.

SKILLS

Languages	Python, JavaScript, SQL, C++
AI & LLM	RAG, Hybrid Search (Elasticsearch), GraphRAG (FalkorDB), Embeddings, Semantic Search, LLM Integration, Prompt Engineering, Conversational AI, AI Voice Agents
Frontend	React.js, HTML5, CSS3, Responsive UI, Component Architecture
Backend	Node.js, FastAPI, REST APIs
Computer Vision	YOLO, DeepSORT, Kalman Filter, OpenCV
Tools & Deploy	Git, GitHub, Vercel, Render, VS Code
Concepts	Data Structures & Algorithms, OOP, SDLC, Agile

EXPERIENCE

AI Engineering Trainee — Magentic AI

May 2026 – July 2026

Gurugram, India

- Built R&D prototypes for GraphRAG retrieval using FalkorDB, modeling entity relationships to raise context relevance for domain-scoped question answering over connected data.
- Engineered an AI meeting note-taker that auto-joins calls and produces structured transcripts and summaries, deployed as a live web service.
- Developed an AI voice-sales agent POC integrating real-time speech with LLM-driven dialogue for outbound calling workflows.
- Shipped supporting backend services, including a multi-tenant file-manager module and a digital-signage CRM, using Node.js and REST APIs.

Full-Stack Developer Intern — Heliverse Technologies

Jan 2026 – Apr 2026

Gurugram, India

- Built a hybrid RAG pipeline over Elasticsearch combining keyword and semantic retrieval to improve answer accuracy across large document sets.
- Developed and deployed an e-commerce AI chatbot (Mira) with a production React chat interface, integrating LLM APIs and structured prompt engineering.
- Shipped 45+ SEO/AI marketing tools, a blog platform, and marketing landing pages (Pipeline AI, People AI) for the Mira community and product sites, built in React with REST backends.
- Implemented supporting services — a Shopify pricing module, HRMS reminder cron jobs, and a tournament-prediction API — across Node.js and FastAPI.

PROJECTS

Verbatim — AI Voice Interviewer

[Live](#) | [GitHub](#)

- Engineered an AI-driven first-round screening tool using LLM-powered conversational voice to generate structured candidate scoring and transcripts; deployed live on Render.

Pedestrian Detection & Tracking System

2025

- Attained 90%+ detection consistency across test video sequences using YOLO with DeepSORT tracking.
- Reduced ID-switch errors by 30% through Kalman filtering and motion-based prediction.
- Sustained 20–25 FPS on standard hardware via pipeline optimization, with re-identification logic for robust occlusion handling.

VisionCraft — AI Image Generation Platform

[GitHub](#)

- Built a full-stack AI image generation platform with prompt-driven workflows and controlled composition for brand-accurate visual output.

AWARDS & CERTIFICATIONS

- 4-Star HackerRank Rating (SQL) — problem-solving and query optimization.
- Top 2% National Performer — American Express Product Track (Round 2).
- Meta Front-End Developer Specialization.

EDUCATION

B.Tech, Computer Science Engineering (Data Science)

2023 – 2027

Punjab Engineering College, Chandigarh
